Election/Restrictions

1. Applicant's election of Group II in the reply filed on February 16, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Objections

2. Claim 6 is objected to because of the following informalities: claim 6, line 10, "encodscope" should be --endoscope--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 7, reciting "a control section" and "at least an external terminal" is indefinite as to whether these are referring back to the previously claimed elements of the same name, or further reciting additional elements.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 6-13 are rejected under 35 U.S.C. 102(a and e) as being anticipated by Uchikubo (U.S. Pat. 6,602,185).

Referring mainly to Figure 13, Uchikubo disclose an endoscope device (83), a control section (80,91,122,123,96,97), a communications network (74), and an external terminal (132,133). Mutual image (note displays 102,104) and voice (col.11, lines 9-11) communication occurs between the control section and external terminal.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
